

SERVICE BULLETIN 02-3901

Contact: Mike Hankins, Director of Customer Relations
Mainship Corporation
mhankins@mainship.com

September 12, 2002

Models Affected: 39 Trawler

The mast installed on current 39 Trawler models is designed to accommodate a radar pod that weighs approximately 24 pounds. The specific weight maximum per this design is no more than 30 lb.

Any installation of electronic or other optional components on the mast REQUIRES additional support or stiffening at customer expense. Failure to do so will create a potential premature failure of mast assembly, which IS NOT covered under Mainship warranty provisions.

Any boats in the field that have had items mounted to the mast assembly MUST have this information addressed to the owner of the vessel in order to prevent this concern.

Questions can be communicated to Mainship Engineering or Warranty/Service department.
Thanks for your assistance.
